

Dunedin Update

February 2024

Last day of school I decided to go into the Octagon with a big box of cans of coke to give out to the school kids. You know when you throw a handful of chips to some sea gulls. Same result giving cokes to school kids.

Had a great time in Queenstown at the Lakelands Christian Camp. I was asked to run a Children's program over four mornings. There was a good mix of boys and girls ranging in age from six, being the youngest, and thirteen being the oldest. All up we had 16 kids attend. Our program was on God's Amazing Animals.

We kicked off with a short video on different animals. First morning was Adam names the animals. Second morning was on Birds and Noah's Ark. Third morning was the amazing Platypus only found in Australia and having different animal parts. A bill like a duck, feet like a reptile, tail like a beaver etc. A real weirdo of the animal kingdom. I explained to the kids that God made strange animals to confuse scientists. This was followed by Peter's vision of the animals coming down on the sheet.

Last morning was on big cats where we watched a video on prehistoric cats some weighing as much as four or five all blacks standing on some weigh scales. The last teaching was about Jesus coming the first time as a lamb and then returning as the Lion of Judah.

One of the afternoons we went into Queenstown to do some outreach but couldn't find a park anywhere so we went into Arrowtown and spoke to about twelve people between the three of us; myself, John Corson and Josh from Canada who is studying at Capernwray.
